USER INFORMATION & DILUTION GUIDE

simple green®

Cleaners & Degreasers

0532021

*"Safer Industrial Strength Cleaning
For Your Home"*

*These formulas are orally non-toxic per The Globally Harmonized System of Classification and Labelling of Chemicals and readily biodegradable per OECD 301D.

The Safer Alternative To Hazardous Cleaners and Solvents

Proven In Industrial and Commercial Environments

biodegradable ~ non-flammable ~ non-caustic ~ non-abrasive ~ non-toxic* ~ no harmful solvents ~ no ammonia concentrated formula ~ no chlorine bleach ~ not tested on animals ~ recyclable packaging

Simple Green Original

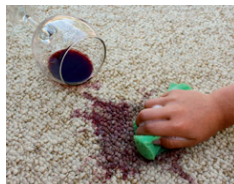

**Concentrated, Biodegradable Formula
Known & Trusted for over 40 Years**

A safer non-toxic* cleaner and degreaser that really works and can be economically custom-diluted with water for many different uses. Simple Green Original carries the Safer Choice label. Check www.epa.gov/safer-choice/standard

Selected as Partner of the Year in 2018 by the U.S. Environment Protection Agency's (EPA) Safer Choice program. The prestige label is awarded to companies that have invested heavily in research and reformulation to ensure their products meet the EPA's Safer Choice Standard. These companies are considered leaders in safer product development and sustainability.

Safer Choice products do not contain known chemicals of potential concern, like carcinogens, reproductive or developmental toxicants – and even minor product components, like dyes and fragrances, are screened for safety.

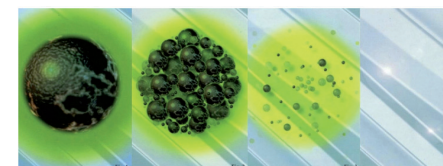

User Safe - Environment Safe

For over 40 years Simple Green products have contributed to safety worldwide in millions of homes and across many industries. Simple Green strives constantly to make the home and workplace a safer place and is considered a leader in the development of effective, safe and versatile cleaning products – products that meet the increasingly demanding requirements of environmental legislation.

How it Works

Simple Green is an organic cleaner which uses a unique method of cleaning called Micro-Particulate Fractionalization (MPF). This process works by the interaction of special “surface active” agents to break down oil, grease and fat, creating microscopic droplets called “micelles”. Water is the catalyst for Simple Green's cleaning power (Fig1). Unlike ordinary cleaners and dispersants, Simple Green's special MPF properties continue to break down these ‘micelles’ into increasingly smaller microscopic droplets (Fig2). Making the droplets smaller and more numerous creates a greater surface area for Simple Green and water to work on, allowing even greater detergent qualities. In the end, the droplets are simply dissolved into the water (Fig3). The end result is a much more efficient and effective way to clean (Fig4).

Excellent Value for Money

All these products are concentrates to be diluted with water according to application - providing great value for money as well as ease of storage. 1L will make on average between 10 - 20L (4.5 gallons) of general purpose cleaner or over 30L (nearly 7 gal. of light cleaner) - equivalent to around 60 x 500 ml spray bottles! See table overleaf for application and dilution guide.

Simple Green Crystal

**Concentrated, Biodegradable Formula With No
Added Colour or Scent**

Simple Green Crystal concentrate - based on Simple Green ‘Original’ and formulated for the pharmaceutical and food industries without colour and fragrance additives but with the same industrial high strength: more suitable for allergy and asthma sufferers, and particularly those susceptible to products with fragrances.

Simple Green Crystal Industrial Cleaner & Degreaser can be used on any washable surface, from floors and walls to laundry. Just like Simple Green Original, Crystal cuts through grease and removes the toughest marks.

Simple Green Crystal is a slightly stronger formula and is also NSF labeled A1, A2, A4, A8, B1 and C1 for use in commercial kitchens, food processing plants and other areas where food is prepared or handled.

Uses

Suitable for any surface which is ‘water safe’ – worktops, floors, sinks, wash basins, baths, WCs, showers, washable wallpapers, painted surfaces etc. Simple Green can also be used on laundry, fabrics and carpets – but always spot check in a hidden area first.

Extreme Simple Green

Aviation Cleaner & Heavy Duty Degreaser - for:

Planes

Trains

Automobiles

We've found no other cleaning product on the market that matches Extreme Simple Green's cleaning performance. Developed primarily for the aviation and aerospace industry, Extreme Simple Green is an excellent cleaner and degreaser and a must-have for applications involving engines, motorsports, aluminium, steel alloys etc.

Extreme Simple Green®, cuts through tough, built up grease, oil, dirt, pollution and insect residue.

Suggested cleaning method

Spray Simple Green cleaning solution (diluted with water) onto surface, allow 5 seconds or more to let it ‘work’, wipe and rinse! For heavily stained items leave Simple Green to work longer always ensuring that you've spot checked first.

*These formulas are orally non-toxic per The Globally Harmonized System of Classification and Labelling of Chemicals and readily biodegradable per OECD 301D.
